LEISURE SERVICES

COMMITMENT TO HEALTH

Per the Florida Recreation and Parks Association... according to the Centers for Disease Control and Prevention (CDC), a healthy community is one that continuously creates and improves both its physical and social environments, helping people to support one another in aspects of daily life and to develop to their fullest potential.

Park and Recreation Departments are at the center of healthy places designed and built to improve the quality of life for all people who live, work, learn, and play within their borders—where every person is free to make choices amid a variety of healthy, available, accessible, and affordable options. To show our commitment to community well-being and public health, The Florida Recreation and Park Association (FRPA) created the State of Health and Wellness Pledge.

In March 2016, Safety Harbor Leisure Services committed to the State Health and Wellness Pledge by adopting department standards in physical activity and nutrition.

PUBLIC WORKS

STREETS

A total of 152 work orders requests were received and 122 were completed by the Street and Stormwater Divisions. One hundred and seventy one cubic yards of concrete used to repair/replace driveways, ADA ramps, curbs and sidewalks. Recycling of dirt accumulated as a result of various city projects performed by city staff or city-hired contractors. This process involves the sifting of the material, which separates the debris from the usable soil. The debris is hauled to a dump site and the remaining soil is stockpiled and reused on future city projects.

STORMWATER

Pamphlets, brochures, and other informational and educational material are available at City buildings to increase public awareness. Information was also made available on the City's website. Placed inlet stencil markers on city-wide catch basins identifying their purpose and importance. Street sweeping debris collection equals to 166 tons. Maintenance of 12.88 miles of ditches and creeks annually. Cleaning and inspection of over 531 catch boxes within the city.

Maintain compliance with SWFWMD (Southwest Florida Water Management District) in conjunction with the Engineering Department. Excavated sediment deposits from ditches and reshaped eroded banks. Cleaned and inspected 71 outfall structures. Repaired 9 catch basins. Completed 6 erosion projects.
